

MIRIAM ESPINO CAMBRON

Profile

I am currently a student at Eastern Connecticut State University majoring in computer science. My life objective is to start a technology business and an organization that will enable less fortunate students with advanced technologies.

Education

Cross Keys High School 2013-2017

Throughout high school, I was an active student in and outside of class. I joined after school clubs that allowed me to expand my leadership skills. These clubs include: Future Business Leaders of America (FBLA), Girls Who Code, Tennis, French Club, National Honors Society, and Yearbook.

Georgia State University Perimeter College 2017-2018

I began my freshman year of college at Georgia State Perimeter College. Due to the efforts I put in my studies I earned the Presidents List for the 2017 Fall semester and the Dean's List for the 2018 Spring semester. After completing prerequisite courses at Perimeter College, I transferred to Eastern Connecticut State University.

Eastern Connecticut State University 2018-2021

I am currently a student and a scholar of TheDream.US at Eastern Connecticut State University. My goal is to graduate from Eastern with a bachelors in Computer Science.

Experience

Retail Volunteer at Suther's Center for Christian Outreach

Suther's Center for Christian Outreach is a charity thrift shop store that helps feed the local community with food. Every Monday, the money that the store makes goes to purchasing fresh meats, fruits, and vegetables to feed the need on Tuesdays and Fridays. I volunteer once a month organizing the donations the shop receives and making sure the customers find what they need.

Building Websites

I was a volunteer at the 2017 48in48 non-profit competition held in Atlanta where my team and I redesigned the North Central Atlanta's Habitat for Humanity website. Additionally, in high school, I was a part of FBLA and competed in two Web Design competitions. I placed second amongst 90 DeKalb County Schools.

Skills

- Strong communication skills
- Problem-solving skills
- Time management skills
- Adaptable to change and new software
- Hardworking
- Technology savvy
- Proficient in Microsoft Office
- Front- End Web Developer

Languages

- Fluent in English
- Fluent in Spanish
- Partial French
